EDUCATION

Rutgers University

B.A. in ITI and CS - Honors Program - Junior - GPA: 3.7

New Brunswick, NJ

Sept. 2024 – May 2028

EXPERIENCE

System Administrator

Rutgers Cybersecurity Club

April 2025 – Present

New Brunswick, NJ

- Engineered and maintained Proxmox-based virtual machine cluster in Linux environments to support cyber defense labs and competition readiness.
- Configured pfSense firewall rules for network segmentation, perimeter security enforcement, and threat mitigation.
- Drafted Incident Response workflows and technical documentation to remediate critical infrastructure vulnerabilities (NIST CVE-2025-66478).
- Deployed scalable infrastructure and network architecture for Scarlet CTF competition, servicing **710+** global teams with high platform availability.

IT Helpdesk Consultant

Rutgers University

May 2026 – Present

New Brunswick, NJ

- Delivered cross-platform L1 technical support across Linux, Windows, and macOS enterprise environments via remote administration tools, phone, and ticketing systems.
- Troubleshoot user authentication, active directory accounts, network connectivity, and enterprise software within MS Office 365 and Windows AD environments.
- Identified, documented, and triaged system/network anomalies in ServiceNow; resolved baseline incidents on first contact while escalating critical infrastructure issues to L2 engineering teams.
- Translated technical diagnostics into clear, non-technical guidance for end-users, ensuring SLA compliance and operational continuity.

PROJECTS

ExfiltrationGroup.com | *HTML, CSS, JS, Git, GitHub Actions, Vercel*

Sept. 2025 – Dec. 2025

- Co-architected educational cybersecurity web application analyzing AI-driven social engineering & phishing threat vectors.
- Developed web interface components using JavaScript, HTML, and CSS, incorporating interactive activities, practical examples, and animations.
- Researched and synthesized threat vectors involving autonomous AI agents and LLM-scale phishing to outline defense frameworks and security education content.
- Designed a lightweight static site architecture managed via Git with workflow deployment processes to ensure rapid performance, low latency, and minimal attack surface.

Digital Blog & Portfolio | *Figma, HTML, CSS, Git, Oracle Cloud, Nginx, Cloudflare*

May 2025 – Sept. 2026

- Designed responsive user interfaces (UI/UX) in Figma, utilizing Material Design guidelines.
- Refined web interfaces and responsive element interactions in VS Code using HTML/CSS for optimal cross-device performance.
- Deployed web architecture on Linux Oracle Cloud Infrastructure (OCI) using Nginx web servers, configuring server blocks, reverse proxy rules, HTTPS/SSL certificates, and Cloudflare DNS routing.

BoomFrame Market Analysis Tool | *Python, REST APIs, JSON, HTTP, Git, Qt*

December 2024

- Developed desktop Python application with Qt-designed GUI, using RESTful HTTP APIs and JSON data to evaluate live market data across **3,000+** items.
- Integrated async data processing to handle large datasets efficiently, filtering output for relevant searching and visual graphical representations.
- Engineered automated installation package to simplify deployment on end-user systems with low technical barrier.

TECHNICAL SKILLS

Languages & Web: HTML/CSS, Python, Bash, Shell Scripting, C, Java, JavaScript, PowerShell, RISC-V Assembly
Developer & Cloud Tools: Git, GitHub Actions, Docker, Nginx, Oracle Cloud (OCI), Cloudflare, Figma (UI/UX), Vercel, VS Code
Systems & Infrastructure: Linux (Oracle/Ubuntu/Kali), Virtualization (Proxmox), pfSense Firewall, System Diagnostics, ServiceNow
APIs & Web Protocols: REST APIs, JSON, HTTP, AsyncIO, TCP/IP, OSI Model, DHCP, SSH, Technical Documentation
