EDUCATION

Rutgers University

B.A. in ITI and CS - Honors Program - Junior - GPA: 3.7

New Brunswick, NJ

Sept. 2024 – May 2028

EXPERIENCE

System Administrator

April 2025 – Present

Rutgers Cybersecurity Club

New Brunswick, NJ

- Engineered and maintained Proxmox-based Linux virtual machine cluster for security labs, network defense competitions (CCDC/CPTC), and system administration training.
- Configured pfSense firewall for network segmentation, perimeter security enforcement, and infrastructure defense.
- Authored Incident Response workflows and technical documentation to remediate server vulnerabilities.
- Deployed scalable network infrastructure and open source tools for Scarlet CTF, supporting **over 710** global competing teams with high availability.

IT Helpdesk Consultant

May 2026 – Present

Rutgers University

New Brunswick, NJ

- Provided cross-platform L1 enterprise technical support across Linux, Windows, and macOS operating systems via remote access tools and ServiceNow ticketing.
- Troubleshoot user authentication, active directory accounts, network connectivity, and enterprise software within MS Office 365 and Windows AD environments for Rutgers students and faculty.
- Identified, documented, and triaged system and network anomalies, resolving technical inquiries on first contact and escalating complex server issues to L2 engineering teams.
- Translated complex technical solutions into actionable guidance while adhering to strict IT service-level standards.

Makerspace Technical Specialist

September 2024 – Present

Rutgers University

New Brunswick, NJ

- Operated and maintained Makerspace equipment including – 3D Printers, Laser Cutter/Engraver, Vinyl Cutter, Sewing + Embroidery Machines, Poster Printer, Waterjet, CNC Mill
- Independently designed and created projects that improved user experience and increased equipment organization, and advised **260+** students on technical problem solving to accomplish end goal

PROJECTS

ExfiltrationGroup.com | *HTML, CSS, JS, Git, Vercel*

Sept. 2025 – Dec. 2025

- Collaborated in a team environment to architect and deploy an open source educational platform analyzing AI-driven social engineering and phishing vectors.
- Designed lightweight static site architecture ensuring minimal attack surface, fast performance, & reliable delivery.
- Utilized Git for version control, collaborative code reviews, and continuous deployment workflows.

Digital Blog & Portfolio | *Linux, Nginx, OCI, Cloudflare, Git, Figma, HTML/CSS*

May 2025 – Sept. 2026

- Deployed and configured Nginx web server on Linux (Oracle Cloud Infrastructure), setting up reverse proxies, SSL/TLS, and custom server blocks.
- Managed DNS routing, security rules, and performance optimization using Cloudflare and command-line Linux administration.

BoomFrame Market Analysis Tool | *Python, AsyncIO, REST APIs, JSON, Qt, Git*

Dec. 2024

- Engineered desktop Python application leveraging asynchronous RESTful HTTP API calls to process and visualize JSON market data across **3,000+** items.
- Created automated installation packages and scripts to streamline deployment across end-user operating systems.

TECHNICAL SKILLS

Operating Systems & Systems Admin: Linux (Ubuntu, Oracle Linux, Kali), UNIX Command Line, System Administration, Virtualization (Proxmox), Containerization (Docker), Nginx Web Server, Oracle Cloud (OCI)

Languages & Scripting: Python, Bash, Shell Scripting, C, Java, PowerShell, HTML/CSS, RISC-V Assembly

Networking & Security: TCP/IP, OSI Model, DHCP, SSH, pfSense Firewall, Network Segmentation, Incident Response, CIA Triad

Tools & Version Control: Git, GitHub Actions, RESTful APIs, JSON, ServiceNow, VS Code, Cloudflare
