Education

Rutgers University — New Brunswick, NJ
B.A. in ITI and CS - Honors Program - Rising Junior - GPA: 3.7 — *Sept. 2024 – May 2028*

Edison High School — Edison, NJ
Weighted GPA: 5.16 — *Sept. 2020 – June 2024*

Experience

System Administrator — April 2025 – Present
Rutgers Cybersecurity Club — *New Brunswick, NJ*

- Lead setup and maintenance of Proxmox-based virtual machine cluster for cybersecurity training and research
- Increase club readiness and preparedness for CCDC and CPTC network defense competitions through practice virtual machine deployment
- Manage pfSense firewall to segment environments, enforce perimeter security, and drafted Incident Response workflow for critical React2Shell (NIST CVE-2025-66478) vulnerability
- Implemented infrastructure for Scarlet CTF (Capture the Flag) competition with **over 710** competing teams

IT Helpdesk Specialist — May 2026 – Present
Rutgers University — *New Brunswick, NJ*

L2 Helpdesk & Field Support — *October 2026 – Present*

- Serve as Tier-2 escalation point for complex hardware, network, and enterprise software incidents, resolving high-priority tickets escalated by Tier-1 consultants via ServiceNow.
- Deliver advanced remote support using Bomgar and conduct campus-wide field support to diagnose and resolve physical network, printer (PaperCut), and lab infrastructure anomalies.
- Perform in-depth system administration, including wireless and wired network surveys, OS deployment, and hardware diagnostics across campus computer labs and university workstations.
- Leverage monitoring tools such as Icinga to proactively detect network outages and infrastructure bottlenecks, collaborating with Tier-3 systems and network teams for rapid remediation.
- Mentor Tier-1 student consultants on advanced diagnostic techniques, ticket escalation protocol, and customer resolution standards.

L1 Helpdesk Consultant — *May 2026 – October 2026*

- Diagnose and resolve the majority of connectivity and configuration issues across lab environments using ServiceNow, Icinga, and PaperCut.
- Remotely assist users with device setup and software troubleshooting, specializing in MS365, Windows AD, Google Apps, Enterprise Wifi, and web connectivity.
- Identify, document, and triage complex network and system anomalies, resolving common user inquiries on first contact and accurately escalating advanced infrastructure issues to Level-2 support teams.
- Provide advanced technical support in person, resolving issues related to networking, hardware, and enterprise software. Also assist users with cybersecurity concerns, multi-factor authentication, and account recovery.
- Log and triage incidents using ServiceNow, ensuring efficient documentation and timely escalation for advanced technical cases.
- Translate complex technical solutions into actionable, non-technical instructions for students and faculty, ensuring rapid issue resolution while adhering to strict service-level standards.

Makerspace Technical Specialist September 2024 – Present

Rutgers University *New Brunswick, NJ*

- Operate and maintain Makerspace equipment including – 3D Printers, Laser Cutter/Engraver, Vinyl Cutter, Sewing + Embroidery Machines, Poster Printer, Waterjet, CNC Mill
- Assist students with safe operation of equipment and advised **260+** students on technical problem solving to accomplish end goal
- Handle multiple tasks simultaneously to accurately implement new equipment into Makerspace workflow
- Troubleshot more than 45 machine failures and execute repairs in high-use environments
- Independently design and create projects that improve user experience and increase equipment organization

Field Captain, Event Host, & Systems Operator August 2024 – September 2026

Bullseye Lasertag *Woodbridge, NJ*

- Managed **100+** customers a night, ensuring safety and smooth operation during events
- Troubleshot and repaired equipment in high-pressure scenarios
- Facilitated expansion of company services and led initiative to increase customer offerings
- Manage tight timetables with multiple back-to-back bookings in a day
- Facilitate customer use of party rooms, with a detailed oriented focus on customer experience
- Maintained 15-minute turnarounds from one party exiting to the next party having room available

Projects

ExfiltrationGroup.com Website | *HTML, CSS, JS, Git, Vercel* Sept. 2025 - Dec. 2025

- Collaborated with 4 peers to architect and launch ExfiltrationGroup.com, an educational platform detailing AI-driven social engineering and phishing
- Researched and synthesized threat vectors involving autonomous AI agents and LLM-scale phishing to outline defense frameworks and create security education content targeting low-tech-literacy users
- Prioritized teaching how to protect yourself and non-technical reader comprehension, increasing phishing awareness
- Leveraged interactive AI tooling to accelerate development of interactive activities, practical examples, animations
- Designed a modular, lightweight static site architecture to ensure minimal attack surface and fast web performance

Digital Blog and Portfolio | *Figma, HTML, CSS, Git, Oracle Cloud, Nginx, Cloudflare* May 2025 – Sept. 2026

- Designed responsive UI in Figma, utilizing Material Design dark theme guidelines
- Refined web interfaces and element interactions in VS Code using HTML/CSS, building a JS-free responsive site
- Deployed web app using Nginx on Oracle Cloud Infrastructure, configuring DNS routing and web server configs

BoomFrame | *Python, Qt, APIs, JSON, HTTP, Git* December 2024

- Developed desktop Python application with Qt designed GUI, using RESTful HTTP APIs and JSON data to evaluate live market data across **3,000+** items
- Integrated Async data processing to handle large datasets efficiently, filtering output for relevant searching and visual graphical representations
- Engineered automated installation package to simplify deployment on end-user systems, enabling anyone to use with low technical knowledge barrier

Technical Skills

Languages: Java, Python, Bash, C, Risc-V Assembly, HTML/CSS
Developer and AI Tools: Git, VS Code, Prompt engineering, Figma, Powershell, Claude & Gemini, Nginx, Cloud Infrastructure (OCI), Cloudflare
Other Skills: TCP / IP Model, CIA Triad, Networking, OSI Model, DHCP, SSH, ChatGPT, LLMs, Github Actions, Github Copilot, AI assisted programming, Adobe Creative Suite, Creative Cloud, Excel, PowerPoint, Word, OneDrive, AV experience, Docker, L1 Helpdesk, Field Support, L2 Helpdesk, Dispatch, Ticketing Systems, Triage
AV Tools: Black Magic Video Systems, Element 2 Lighting Console, ChamSys MagicQ/QuickQ Lighting Systems
Other Tools: Microsoft Office Suite, Salesforce, Fusion 360, Adobe Photoshop & Illustrator, SharePoint, ServiceNow
Operating Systems: Proficient in Windows and Linux systems with intermediate experience in MacOS
