EDUCATION

Rutgers University

B.A. in ITI and CS - Honors Program - Rising Junior - GPA: 3.7

Edison High School

Weighted GPA: 5.16

New Brunswick, NJ

Sept. 2024 – May 2028

Edison, NJ

Sept. 2020 – June 2024

EXPERIENCE

System Administrator

Rutgers Cybersecurity Club

April 2025 – Present

New Brunswick, NJ

- Led setup and maintenance of Proxmox-based virtual machine cluster for cybersecurity training and research
- Increase club readiness and preparedness for CCDC and CPTC network defense competitions through practice virtual machine deployment
- Manage pfSense firewall to segment environments, enforce perimeter security, and drafted Incident Response workflow for critical React2Shell (NIST CVE-2025-66478) vulnerability
- Implemented infrastructure for Scarlet CTF (Capture the Flag) competition with **over 710** competing teams

IT Helpdesk Consultant

Rutgers University

May 2026 – Present

New Brunswick, NJ

- Diagnose and resolve the majority of connectivity and configuration issues across lab environments using ServiceNow, Icinga, and PaperCut.
- Remotely assist users with device setup and software troubleshooting, specializing in MS365, Windows AD, Google Apps, Enterprise Wifi, and web connectivity.
- Identify, document, and triage complex network and system anomalies, resolving common user inquiries on first contact and accurately escalating advanced infrastructure issues to Level-2 support teams.
- Provide advanced technical support in person, resolving issues related to networking, hardware, and enterprise software. Also assist users with cybersecurity concerns, multi-factor authentication, and account recovery.
- Log and triage incidents using ServiceNow, ensuring efficient documentation and timely escalation for advanced technical cases.
- Translated complex technical solutions into actionable, non-technical instructions for students and faculty, ensuring rapid issue resolution while adhering to strict service-level standards.

Makerspace Technical Specialist

Rutgers University

September 2024 – Present

New Brunswick, NJ

- Operate and maintain Makerspace equipment including – 3D Printers, Laser Cutter/Engraver, Vinyl Cutter, Sewing + Embroidery Machines, Poster Printer, Waterjet, CNC Mill
- Assist students with safe operation of equipment and advised **260+** students on technical problem solving to accomplish end goal
- Handle multiple tasks simultaneously to accurately implement new equipment into Makerspace workflow
- Troubleshoot more than 45 machine failures and execute repairs in high-use environments
- Independently design and create projects that improve user experience and increase equipment organization

Field Captain, Event Host, & Systems Operator

Bullseye Lasertag

August 2024 – September 2026

Woodbridge, NJ

- Managed **100+** customers a night, ensuring safety and smooth operation during events
- Troubleshoot and repaired equipment in high-pressure scenarios
- Facilitated expansion of company services and led initiative to increase customer offerings
- Manage tight timetables with multiple back-to-back bookings in a day
- Facilitate customer use of party rooms, with a detailed oriented focus on customer experience
- Maintained 15-minute turnarounds from one party exiting to the next party having room available

PROJECTS

ExfiltrationGroup.com Website | *HTML, CSS, JS, Git, Vercel*

Sept. 2025 - Dec. 2025

- Collaborated with 4 peers to architect and launch ExfiltrationGroup.com, an educational platform detailing AI-driven social engineering and phishing
- Researched and synthesized threat vectors involving autonomous AI agents and LLM-scale phishing to outline defense frameworks and create security education content targeting low-tech-literacy users
- Prioritized teaching how to protect yourself and non-technical reader comprehension, increasing phishing awareness
- Leveraged interactive AI tooling to accelerate development of interactive activities, practical examples, animations
- Designed a modular, lightweight static site architecture to ensure minimal attack surface and fast web performance

Digital Blog and Portfolio | *Figma, HTML, CSS, Git, Oracle Cloud, Nginx, Cloudflare*

May 2025 – Sept. 2026

- Designed responsive UI in Figma, utilizing Material Design dark theme guidelines
- Refined web interfaces and element interactions in VS Code using HTML/CSS, building a JS-free responsive site
- Deployed web app using Nginx on Oracle Cloud Infrastructure, configuring DNS routing and web server configs

BoomFrame | *Python, Qt, APIs, JSON, HTTP, Git*

December 2024

- Developed desktop Python application with Qt designed GUI, using RESTful HTTP APIs and JSON data to evaluate live market data across **3,000+** items
- Integrated Async data processing to handle large datasets efficiently, filtering output for relevant searching and visual graphical representations
- Engineered automated installation package to simplify deployment on end-user systems, enabling anyone to use with low technical knowledge barrier

TECHNICAL SKILLS

Languages: Java, Python, Bash, C, Risc-V Assembly, HTML/CSS

Developer and AI Tools: Git, VS Code, Prompt engineering, Figma, Powershell, Claude & Gemini, Nginx, Cloud Infrastructure (OCI), Cloudflare

Other Skills: TCP / IP Model, CIA Triad, Networking, OSI Model, DHCP, SSH, ChatGPT, LLMs, Github Actions, Github Copilot, AI assisted programming, Adobe Creative Suite, Creative Cloud, Excel, PowerPoint, Word, OneDrive, AV experience, Docker

AV Tools: Black Magic Video Systems, Element 2 Lighting Console, ChamSys MagicQ/QuickQ Lighting Systems

Other Tools: Microsoft Office Suite, Salesforce, Fusion 360, Adobe Photoshop & Illustrator, SharePoint, ServiceNow

Operating Systems: Proficient in Windows and Linux systems with intermediate experience in MacOS
